Screenshots with Doodle Marks

(Attach annotated screenshots highlighting areas of improvement.)

Improvements / Suggestions with Feedback Noted:

- The home screen should scroll back to the top when refreshed.
- Currently, after refreshing, the page only scrolls up a little instead of fully resetting.
- Improve user experience by ensuring a full scroll reset after refresh.

Screenshots with Doodle Marks

(Attach annotated screenshots highlighting areas of improvement.)

Improvements / Suggestions with Feedback Noted:

- Ensure smooth scrolling behavior for better navigation.
- Provide an option/button for 'Scroll to Top' for easy accessibility.
- Implement auto-scroll to top functionality upon page refresh.

Additional Suggestions:

- Improve UI consistency when refreshing different pages.
- Add user preference settings for default scrolling behavior.
- Optimize page refresh performance for a smoother experience.

Feedback:

- Current scrolling behavior is inconsistent and may confuse users.
- Implementing auto-scroll to top will enhance usability.
- Minor UX improvements can significantly impact user satisfaction.

Overall Conclusion:

- The refresh behavior should fully scroll to the top instead of partial scrolling.
- Adding a manual 'Scroll to Top' button can further improve usability.
- Small UX enhancements can make navigation more intuitive and seamless.
