→ The download button is not working

The homescreen on any place should scroll back to top When someome refreshes but its only scrolling a little bit.

→ Instead of this, a dropdown would be better with a heading Language & it contaii English, Hindi etc.
(It would be better to use it in the settings menu)

→ The positioning of the content of the table is little to the right.
→ It should be little left to match with the header.
→ You can also use ⟨table⟩ in its frontend code.

→ This button is not working.
